INTERVIEW PALS

#

#Cross platform mobile app development (React Native)
#MobileApplication
#Video session
#Startup

Client **StartUp**

About the client

Client has a goal to launch a mobile application where talents can find a coach for an interview in a few clicks. The platform allows customers to select professionals for self- presentation skills improvements that sequentially will boost Interview results.

Challenge

The platform should allow us to build relationships between client and coach. The fee is negotiated between coach and candidates, based on caliber, experience and profile strength of coach. Platform then takes a fixed fee from each agreed transaction via Stripe.
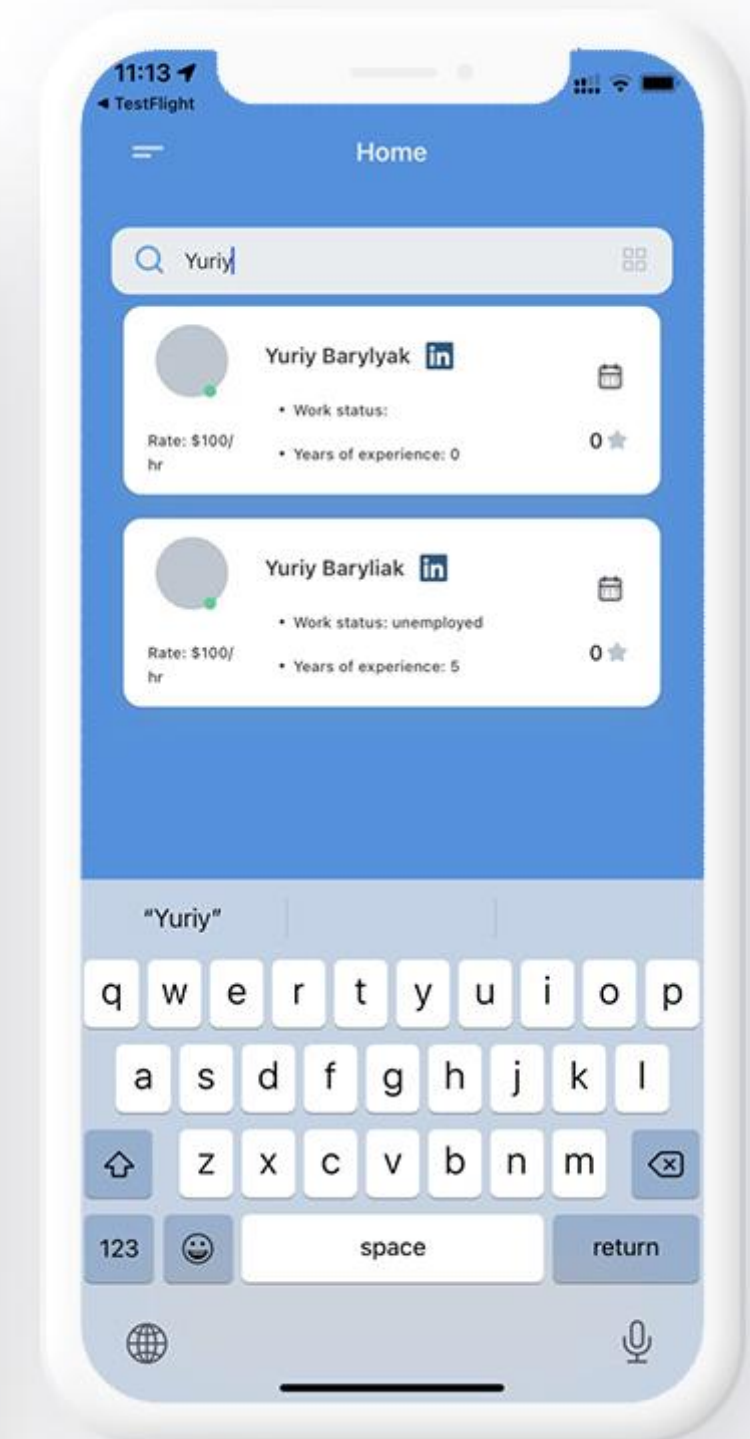

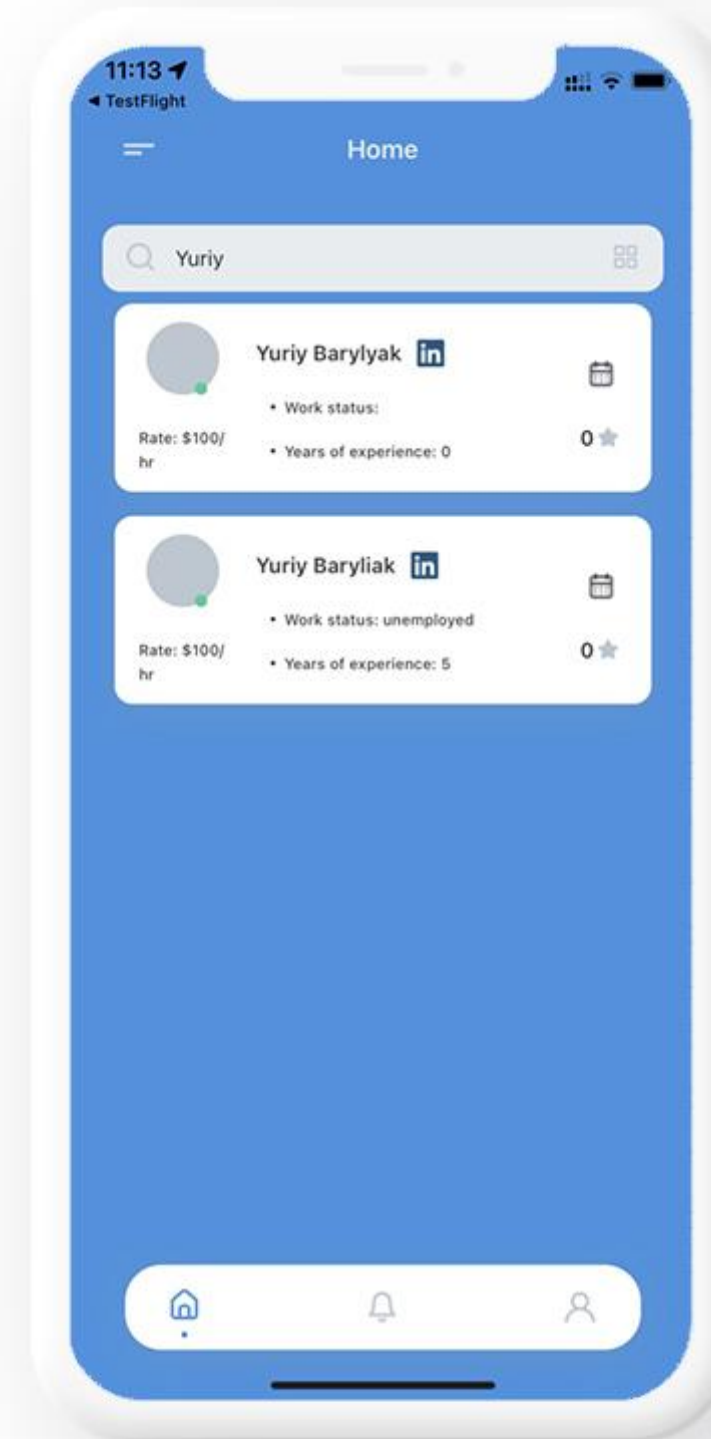

Core Requirements

- Tight time to market (limited time for MVP version development)
- The platform should work on iOS and Android devices
- High quality real video session
- Chat
- Booking option
- Popular and reliable payment method for clients
- Connect user and coach

Solution

- Use pre-made template instead of design phase
- Create cross-platform application
- Use 3rd party solution: stripe, twilio, cal.come
- Elastic search for an easy search for a coach based on criteria

Our team has found the best solution for the client. Our developer found a template for speeding up the development part. We decided to develop a mobile app on React navite using 3rd party for faster and easier implementation. Clients can arrange a call, leave feedback, review feedback, search coach, pay for the call, see video-call etc.
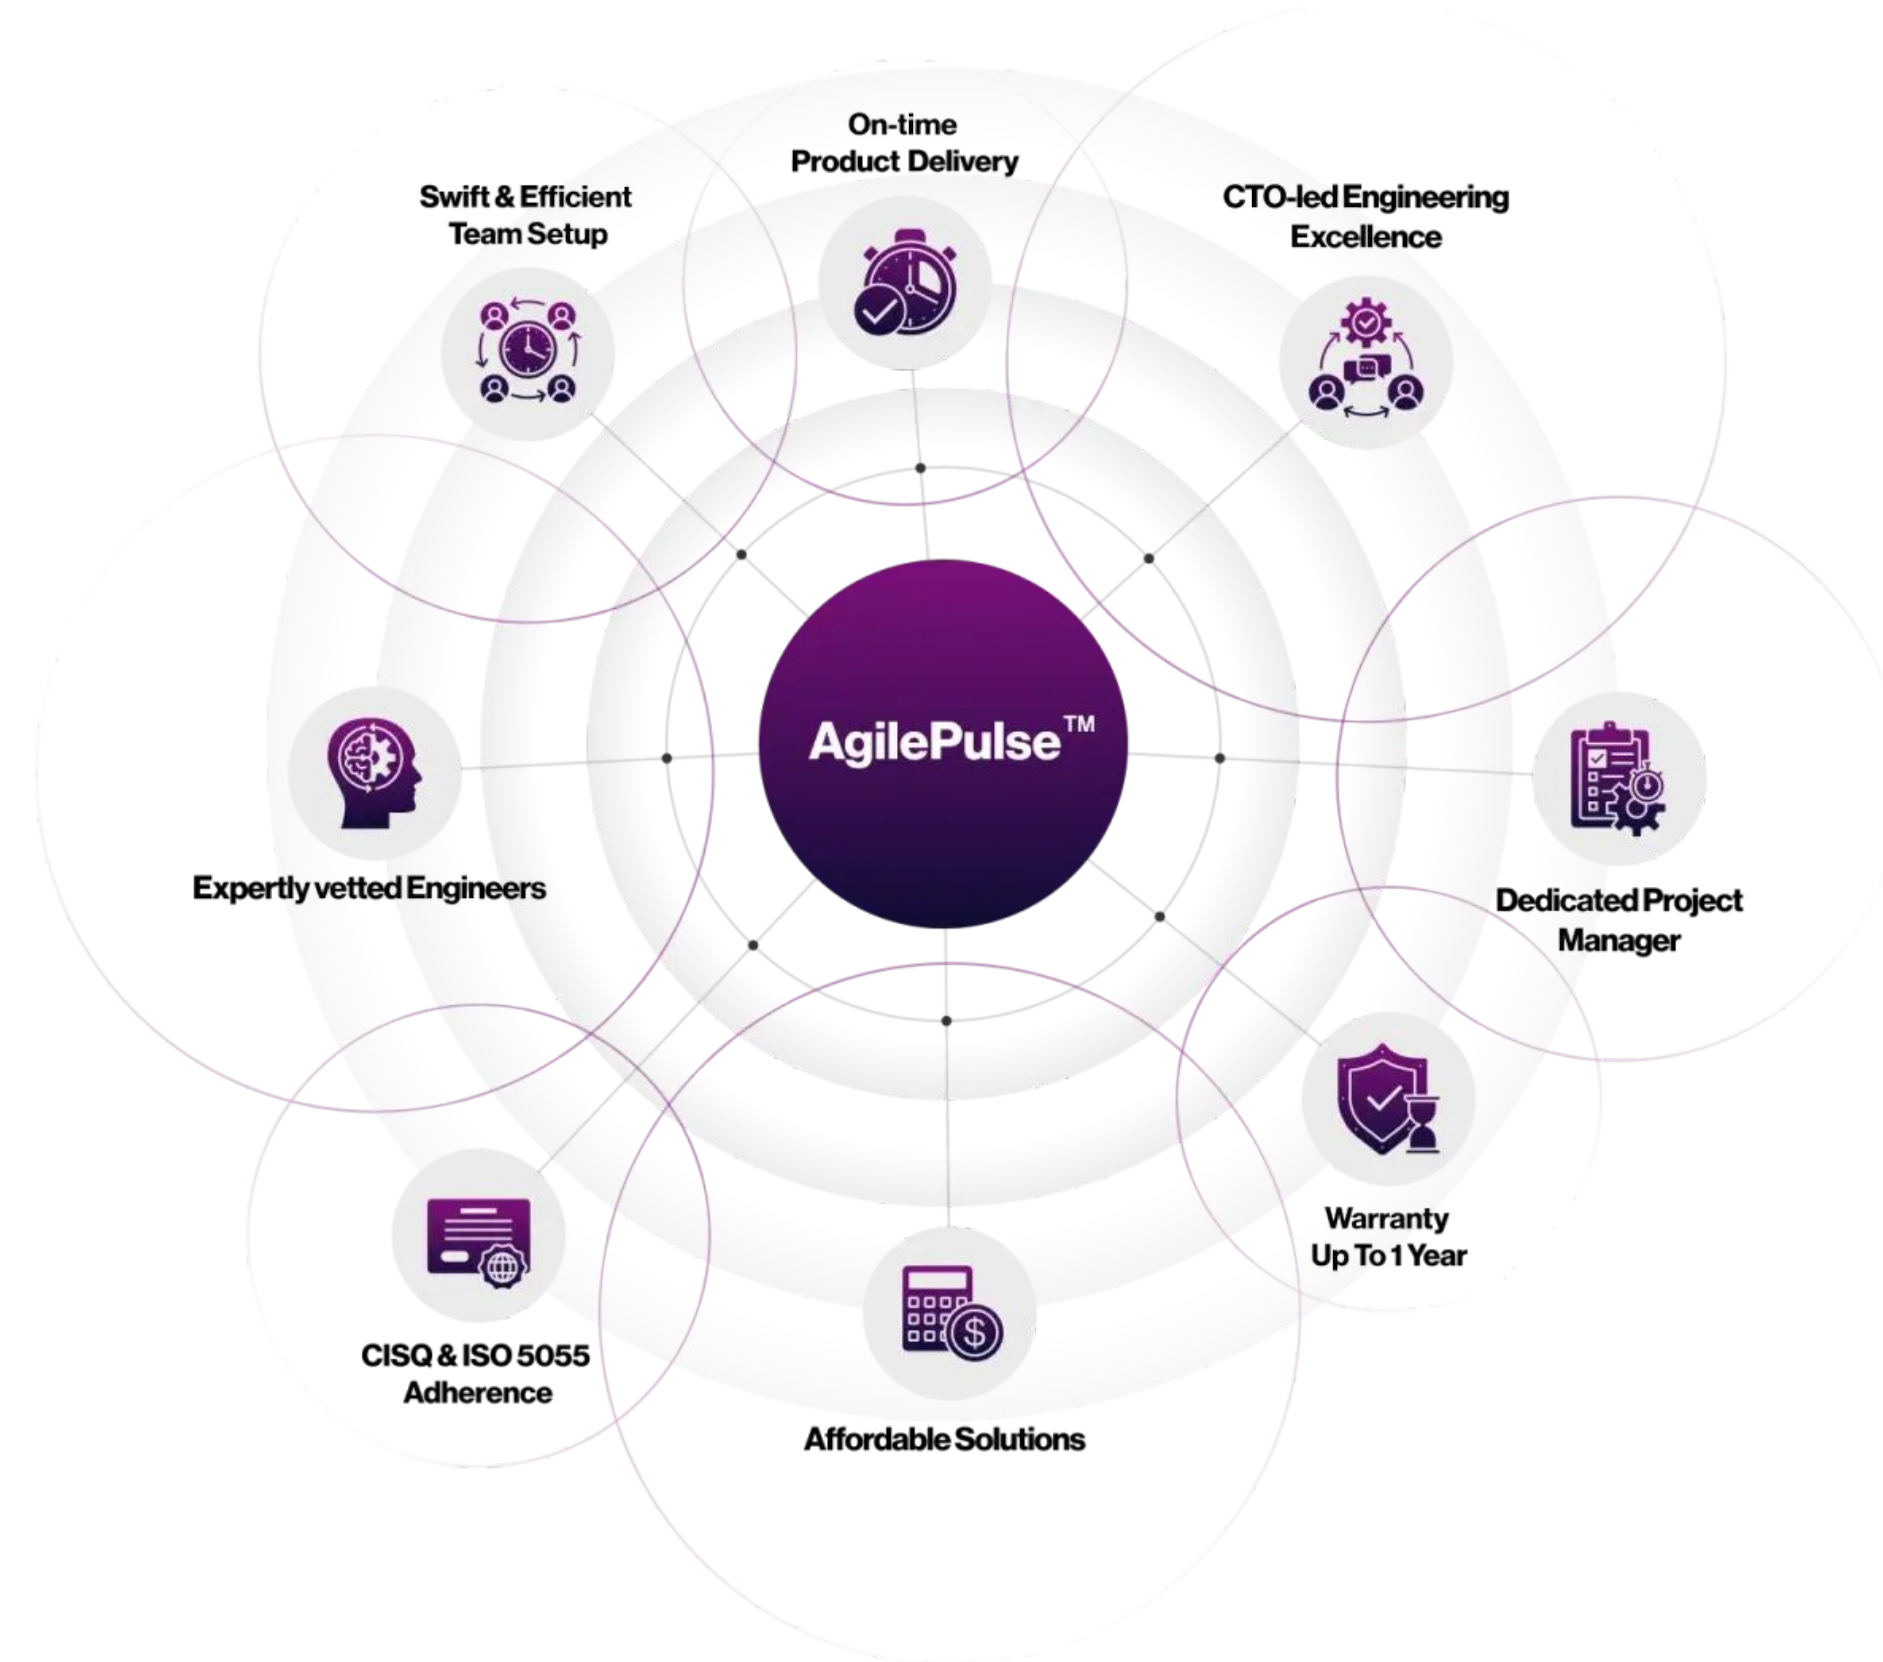

Architecture

Benefits of Clover Dynamics

At Clover Dynamics, we believe in building long-term relationships with our clients through exceptional customer experience. We provide a full cycle of product development services & Team Extension, that go beyond coding and into the realm of delivering value. Our team of skilled professionals is dedicated to helping our clients achieve their business goals through innovative technology solutions and unparalleled customer experience.
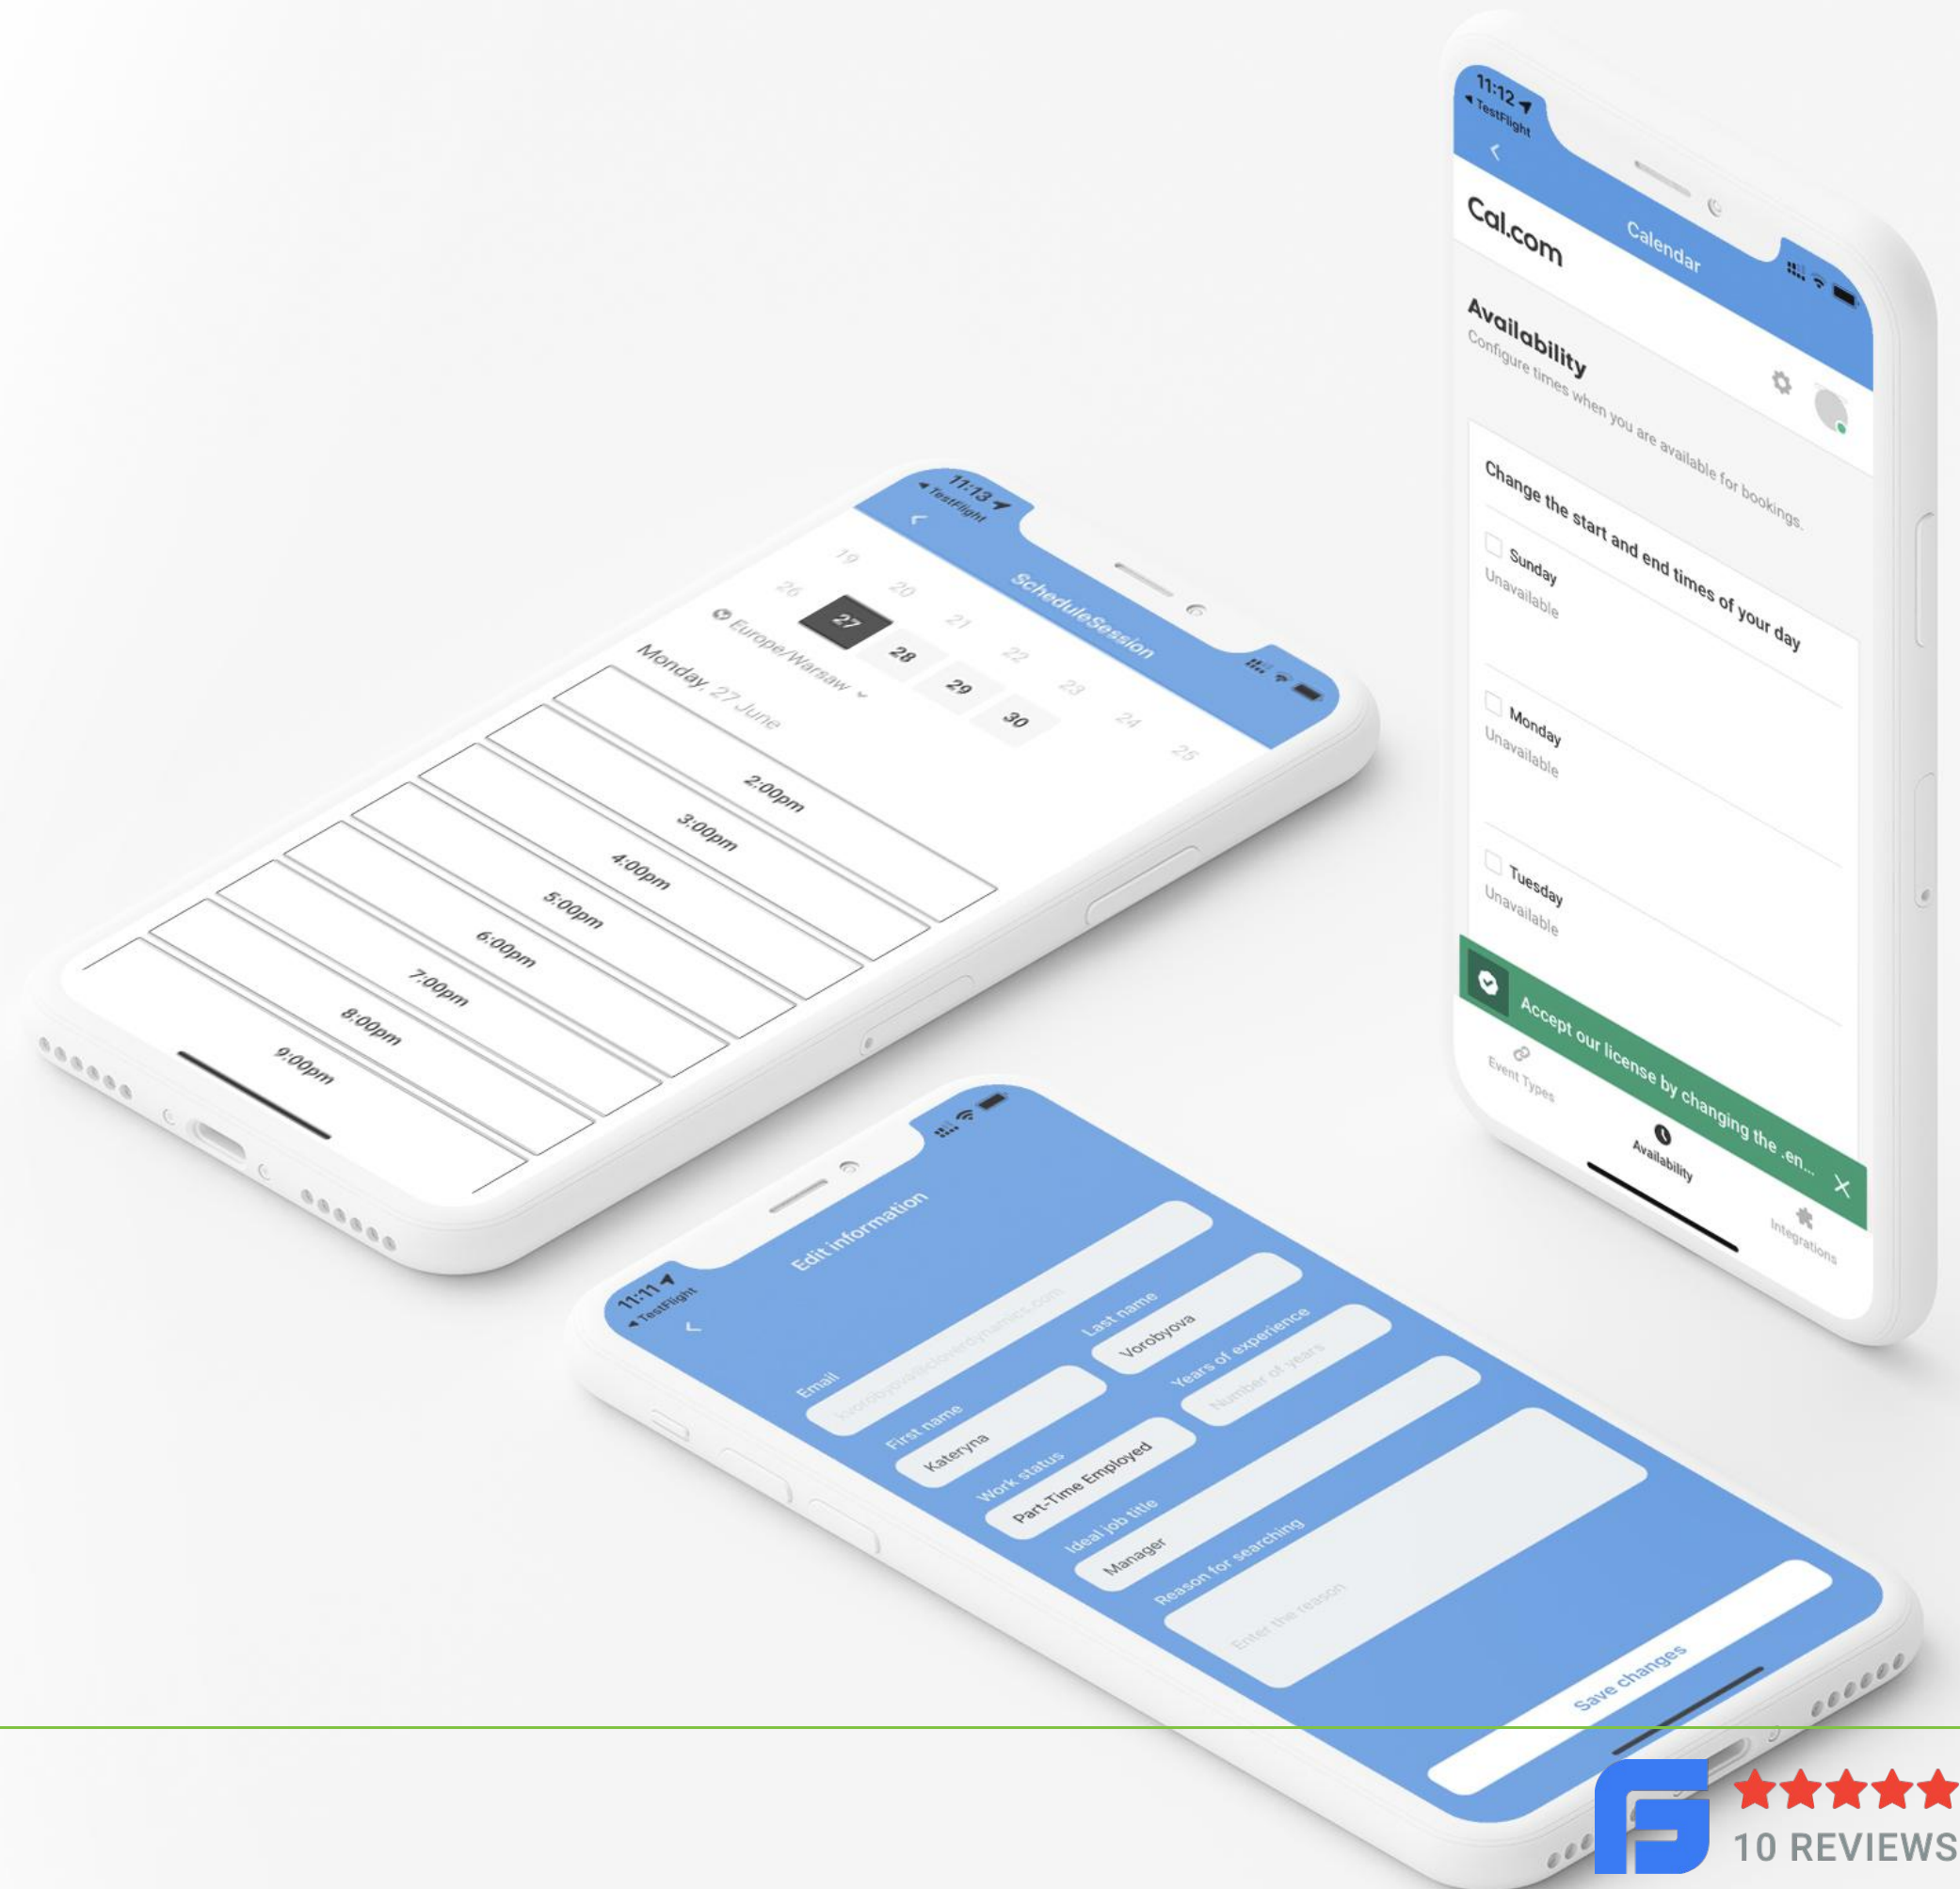

Drive your project to success with CTO-led engineering excellence, ensuring that every aspect of your development is guided by top-tier expertise and precision. Our expertly-vetted engineers are selected through a rigorous process, guaranteeing that your team is composed of subject matter experts dedicated to delivering quality results. Benefit from continuous CTO oversight throughout your project, providing a layer of strategic insight and oversight that sets the standard for excellence.

Swift & Efficient Team Setup

On-time Product Delivery

CTO-led Engineering Excellence

Expertly vetted Engineers

Dedicated Project Manager

CISQ & ISO 5055 Adherence

Affordable Solutions

Warranty Up To 1 Year

Features

- Payment via Stripe
- Cal.com
- Twilio chat
- Ability to arrange a video call
- Search feature
- Feedback and review options

Process

Discovery Phase - our tech leader has prepared a proposal with the best practice for optimizing time and budget. Mobile developer has found template for the project, this solution reduce time for design.

Solution Implementation - our team has developed the project as fast as we can, using 3rd party integration.

Next steps

Client wants to launch MVP and get feedback from users for future development. We connected Google Analytics for better understanding.
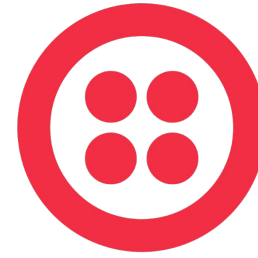

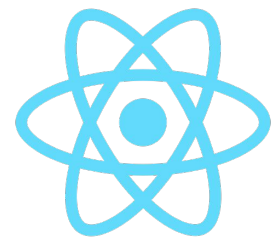

Technologies

Services

- Custom Mobile Development
- Project Management
- DevOps
- Quality Assurance

Country

Cyprus and USA

Team

Engineering

- 1 Backend Developer - 40 hours/week
- 1 Mobile Developer - 40 hours/week
- QA Engineer - 17 hours/week
- DevOps - 15 hours

Management

- PM - 9 hours/week

Duration

3 months

Status

Development phase
